## ***THE COMMITMENT OF PISCINAS DE LA FLOR A LABEL AT THE SERVICE OF QUALITY, CONTROL AND PLEASURE OF WATER***

*With the pooling of the experience of the ZONA DE  
BAÑO group, PISCINAS DE LA FLOR offers you your  
maintenance contract adapted to your needs and the  
specificities of your installation.*

*Beyond the simple closing and opening operations, the  
interest of our maintenance contract is to ensure:*

- A periodic diagnosis of all the elements of your pool.*
- A diagnosis of chemical, mechanical, hydraulic, and  
electrical parameters.*
- Your installation regularly maintained, you will prevent  
the appearance of certain breakdowns and you will give  
all chances to enjoy serenely your pool during the  
season.*

**ZB ZONA DEBAÑO**

*Maintaining your pool means maintaining your aquatic and functional technical environment 365 days a year.*

**WATER LINE:** Regular cleaning of the water line will prevent you from the appearance of an ugly black line that is very difficult to get rid of.

**WATER QUALITY:** Your water should be checked regularly.

-The PH must be between 7.2 and 7.6.

-The chlorine level between 1 and 2 ppm.

-The stabilizer rate between 30 and 80 ppm.

-The salt level between 3.5 and 6 g per liter of water (depending on the devices).

**NETTOYAGE ROBOT:** It works for you so do not hesitate to activate it so that it gets rid of impurities often source of pollution.

**FILTRATION:** Don't let your filter get clogged. Filters should be washed and rinsed to ensure optimal filtration quality.

**EQUIPMENT:** During our maintenance operations, our qualified technicians will check all the elements of your installation to prevent possible failures.
